

# MEDICARE REFUND

## Medicare does issue refunds!

Repaying Medicare for conditional payments is a necessary but unpleasant process which can result in a greatly reduced net recovery or no recovery at all for an injured Medicare beneficiary.

Despite Medicare's blind application of the repayment regulations, there is a way for the injured Medicare beneficiary to increase his/her net recovery. This is by way of obtaining a refund from Medicare which sounds crazy, but it works.

Current success rate: 87%

Total refunds in 2020	\$2,146,948.77
Average 2020 refund amount	\$39,758.31
Total refunds in 2013-20	\$8,897,438.22

There is no filing deadline, we have obtained refunds more than three (3) years after the original payment was made.
